**TERMITE AND PEST CONTROL**

**SPECIALIZING IN TERMITE FUMIGATION, FOAM INJECTION SYSTEM FOR LARGE MULTI-UNITS BUILDINGS & PEST CONTROL.**

## **ANT/INSECT CONTROL PREPARATION LIST**

This letter is to inform you of your upcoming interior pest control spray. Please follow the directions below in order for the treatment to be a complete success.

- Clear baseboards throughout.
- Be prepared to vacate all humans & pets for approximately 2-3 hours following treatment, if you have fish aquarium(s) cover them and unplug the air pump (We are not responsible for your fish).
- If applicable Mow and water before we arrive. The treatment works best if you do NOT mow or water for at least 2 days following treatment.
- Leave gates unlocked
- Completely empty & wipe all kitchen and bathroom cupboards & countertops before we arrive.
- Pile items on tables, couches, etc, or in middle of floors (not against baseboards). Cover items completely with sheets, blankets, etc.
- Clean stove tops (lift and clean undersides of top).
- Pull out refrigerator and clean back, bottom and floors.
- Upon return, you may find dead insects, wipe them up. Then wipe down all countertops, tables and table tops. Do not wipe out cupboards. You may put return your items without fear of contamination.
- Allow 2 full weeks for treatment to take full effect, if you are still having a problem after that please feel free to call our office.
